

1. K-LOVE, a non-profit, listener supported radio serves me all day - every day - I listen to it at work. This station keeps me connected with the community that I need to be in touch with.
2. If this station (91.1 in Denver) is displaced by a low power station, thousands and thousands of people lose the ability to stay connected via this valuable resource. I live 80 miles from where the station broadcast is from - if this goes to low power - I lose it. If it is displaced by low power, I lose it.
3. As a Christian, it is my responsibility from God to help teach others about my faith. By having and supporting this station, I am fulfilling my responsibility - and so are approx 2 million listeners across the USA. Please don't take away this valuable resource that give parents a "safe place" to have the family listen. There are no 7-second delays needed on this station that plays family-safe, wholesome music - 24x7

Thank you.
